

CONTENTS

NUMBER 1

Articles

M. Afeef and L. B. Mullett

- 1 Solar transmission in salt solutions with reference to solar ponds

D. C. Onyejekwe

- 11 Cold storage using eutectic mixture of NaCl/H₂O: an application to photovoltaic compressor vapour freezers

A. H. Zahed and M. M. Elsayed

- 19 Mathematical modelling of a solar kiln

A. Al-Karaghoul, N. Al-Hamdani and W. Al-Sinan

- 29 Iraqi solar house cooling season performance evaluation

P. D. Dan and J. C. V. Chinnappa

- 41 The cooling of water flowing over an inclined surface exposed to the night sky

K. Kanayama and H. Baba

- 51 Analysis and experiment of the performance of a flat-plate solar collector considering the wavelength dependence

C. Sorapipatana and R. H. B. Exell

- 59 Mesoscale mapping of daily insolation over Southeast Asia from satellite data

Technical Notes

O. D. Corbella and C. R. Garibotti

- 71 Comments about the comparison between a conventional and solar powered absorption refrigeration system

A. Venkatesh and A. Mani

- 75 Comparison of performances of single stage and two stage intermittent ammonia-water solar refrigeration systems

M. Santamouris and B. D. Katsoulis

- 79 Solar radiation over the northwest part of Greece

A. Anani, Z. Jibril and F. Abu-Allan

- 85 A standardized procedure to the study of cost-effectiveness of renewable energy systems in Jordan

J. Hossain

- 91 Estimation of specific annual energy generation from wind in Antarctica

Book Review

A. A. M. Sayigh

- 97 Solar Cells: Their Optics and Metrology. By M. M. Koltun

Calendar of Events

- 99

NUMBER 2

Articles**L. D'Alessio and M. Paolucci**

- 101 Energetic aspects of the syngas production by solar energy: reforming of methane and carbon gasification

M. Martinez

- 105 Perspectives for energy diversification in Mexico

S. Barbaro, G. Cannistraro, C. Giaconia, A. Orioli and S. Trapani

- 111 An analysis of direct solar transmittance and atmospheric turbidity in the Mediterranean climatic belt

R. Festa and C. F. Ratto

- 125 About the importance of correct albedo determination in modeling the diffuse irradiation on tilted surfaces

H. M. Ali

- 137 Potential of solar ponds in hot climates

H. H. Nigim and G. A. Jabbar

- 143 Aerodynamic testing of multi-bladed wind rotors at low Reynolds numbers

S. S. Nandwani

- 149 Design, construction and experimental study of electric cum solar oven—II

J. N. Raju

- 159 An energy efficient drying chamber for FCV tobacco curing process

Technical Notes**V. L. Fara, R. Grigorescu and H. Al. Ammouri**

- 165 Efficiency determination of solar installation by computer simulation of its working parameters

J. Prakash, H. P. Garg, D. S. Hrishikesh and R. Jha

- 171 Performance studies of an integrated solar collector-cum-storage water heating system with transparent insulation cover

K. Jafarpur and M. A. Yaghoubi

- 177 Solar radiation for Shiraz, Iran

Calendar of Events

181

NUMBER 3

Articles**S. Z. Baykara and E. Bilgen**

- 183 Solar hydrogen production by hybrid process of water thermolysis and electrolysis

A. Esper, K. Lutz and W. Mühlbauer

- 189 Development and testing of plastic film solar air heaters

V. B. Gandhe, A. Venkatesh and V. Sriramulu

- 197 Thermal analysis of an FMDF solar concentrator

Kh. H. Al-Jamal and A. A. M. Sayigh

- 203 Design for comfort in Gaza Strip and the West Bank

A. Öztas and K. Taner

- 213 A solar desalination plant for conditions in Turkey

Y. G. Caouris

- 217 Energy savings in water-sprayed double-covered greenhouses

Y. G. Caouris, C. Kittas and M. Santamouris	225	Regional monthly estimation of greenhouse energy consumption—application to Greece
Y. Hamakawa	235	Status of a-Si technology and its applications to optoelectronics devices
Y. Hamakawa	241	Physics and technologies of efficiency improvements for amorphous silicon solar cells
<u>Data Bank</u>		
A. Maafi and A. Adane	247	A two-state Markovian model of global irradiation suitable for photovoltaic conversion
S. Alterio, S. Barbaro, G. Cannistraro, C. Giaconia, A. Orioli and S. Trapani	253	A more reliable relation between Angström and Linke atmospheric turbidity parameters
C. I. Ezekwe	257	Effect of harmattan dust on infrared sky radiation
<u>Technical Notes</u>		
K. K. Gopinathan	265	Diffuse irradiation contours for southern Africa
S. O. Onyegegbu	275	Performance of photovoltaic cells in an equatorial climate
C. U. Okujagu and S. K. Adjepong	283	Performance of a simple flat plate solar collector at an equatorial location
<u>Book Reviews</u>		
A. A. M. Sayigh	291	Design for Northern Climates: Cold-Climate Planning and Environmental Design. By Vladimir Matus
A. A. M. Sayigh	291	Engineering Principles and Concepts for Active Solar Systems
Calendar of Events	293	

NUMBER 4

SPECIAL ISSUE: INTERACTION BETWEEN PHYSICS AND ARCHITECTURE IN ENVIRONMENT CONSCIOUS DESIGN

O. D. Corbella	295	Introductory remarks: energy, development and environmental conscious design
<u>Physics and Architecture</u>		
S. Yannas	301	Physics and architecture. Issues of knowledge transfer and translation to design
S. Los	309	Architecture and building science for energy conscious design
A. Frangoudakis	317	Can we draw a line between heat transfer and architecture?
M. J. Holtz	323	The application of research results to architectural practice: context, theory, experience and future directions
E. de Oliveira Fernandes	329	The actors in building design: is there any reason for new design team strategies?

Modelling and Simulation**A. Dupagne****J. A. Clarke****S. R. Hastings****S. Mahajan****Case Studies of Bioclimatic Design****M. Al-Zuhair and A. A. M. Sayigh****R. Costa****N. Borda-Diaz, P. I. Mosconi
and J. A. Vazquez****H. P. Garg and R. L. Sawhney****V. Wittwer****M. A. Gulma, S. L. Lorenzo
and J. O. Falaiye****Climatic Data and Modelling****C. F. Ratto****J. K. Page****P. C. Jain****M. M. Bonzagni and R. Guzzi****F. Parmiggiani and R. Guzzi**

- 333 Applying a solid modelling language to built-form representation and evaluation
- 345 Building energy simulation: the state-of-the-art
- 357 Computer design tools for climate-responsive architecture
- 365 Modelling of energy conserving and passive solar buildings
- 369 Designing for comfort in Iraq
- 383 Architecture in black Africa between development and tradition
- 389 Passive cooling strategies for a building prototype design in a warm-humid tropic climate
- 401 A case study of passive houses built for three climatic conditions of India
- 419 Translucent insulation for passive solar energy utilization in buildings
- 427 Passive solar houses in northern Nigeria: the west African sub-region
- 433 Climatic data availability and modelling
- 441 Operational aspects of using meteorology for energy purposes
- 493 Modelling of the diffuse radiation in environment conscious architecture: the problem and its management
- 501 Modelling the energetic impact. Two case studies: the natural energy in a town and in an industrial plant
- 509 The use of high resolution satellite images for land planning and urban development management

NUMBER 5**Articles****A. A. Badran****J. Müller, G. Reisinger,
J. Kisgeci, E. Kotta,
M. Tesic and W. Mühlbauer****A. M. Mujahid, M. Audi
and F. Al-Habdan****M. F. A. Alias, A. H. Al-Foadi,
A. A. J. Al-Douri, F. S. Hasoon
and L. L. Kazmerski**

- 517 The water-trickle ceramic solar collector
- 523 Development of a greenhouse-type solar dryer for medicinal plants and herbs
- 531 Heat transfer coefficient for asymmetric heated rectangular duct in transient state
- 537 Optical properties of a-Si:B films

C. Armenta	541	Cycling efficiency improvement in photovoltaic lead-acid storage batteries
X. Berger and J. Bathiebo	551	From spectral clear sky emissivity to total clear sky emissivity
P. C. Agrawal	557	A review of passive systems for natural heating and cooling of buildings
E. L. Ameziane, M. Khaidar, A. Bennouna, A. Abouelaoualim and A. Essafti	569	Thermal annealing effects on aluminium-amorphous silicon diode prepared by RF sputtering
F. A. W. Hamad	573	Experimental study of natural convection heat transfer in inclined cylindrical annulus
S. Rheault and E. Bilgen	581	Experimental study of the thermal performance of automated venetian blind windows
B. S. Negi, S. S. Mathur and T. C. Kandpal	589	Optical and thermal performance evaluation of a linear Fresnel reflector solar concentrator
C. D. Rakopoulos	595	Auxiliary power supply mode and water draw profile effects on the performance of thermosyphonic solar heaters with heat exchanger
<u>Data Bank</u>		
Y. Z. Jafri, N. Farooqui, A. U. Durrani and S. M. Raza	605	Wind resource potentials at Quetta
K. Zabara and H. Zenginoglou	611	Statistical analysis of relative sunshine in Athens
<u>Technical Notes</u>		
M. R. I. Ramadan	615	Effect of minority carrier lifetime in solar cells
M. R. I. Ramadan and A. A. El-Sebail	619	Comparison of measured and predicted data of solar radiation over Tanta
M. L. Helmy	623	Axial flow turbine design for wind power
A. A. Ammar, A. M. Okaz and A. A. Ghoneim	627	Investigation of optimum parameters for solar domestic hot water system in Alexandria, Egypt
A. El-Mallah and A. M. Soltan	633	A nomogram for estimating capacity factors of wind turbines using site and machine characteristics
<u>Book Reviews</u>		
A. A. M. Sayigh	637	Wind Turbine—Worldwide Catalogue 1988-89
A. A. M. Sayigh	637	Solar Design: Components, Systems, Economics. By J. F. Kreider, C. J. Hoogendoorn and F. Kreith
L. B. Mullett	639	Amendment
Calendar of Events	641
